

Technical Data Sheet (TDS)

- A Technical Data Sheet is a document from a supplier, which describes the technical data of a raw material.
- All raw material handled by Trioplast shall have a TDS.
- Trioplast uses the TDS for a first evaluation of the material.
- The TDS shall normally be approved before any tests of the material.
- The TDS shall contain any information that is important for our use of the material in the intended application.
- Trioplast purchasing department shall be informed at least six months before any changes in the TDA.
